Interview with Professor Joachim James Calleja, President EfVET and Principal/CEO of Malta College of Arts, Science and Technology

In this issue, Professor Calleja, the president of EfVET - European forum of Technical and Vocational Education and Training -, gave his view on the future of VET in the automotive industry, as a major pillar of European prosperity. We asked Professor Calleja about how young generations will contribute differently to the future of the sector, the differences between VET provision in the Members States and the necessity of re-skilling and up-skilling in this sector.

DRIVES’ Alert

Coronavirus Pandemic - Allowing continuous trainings in the automotive sector

DRIVES project partnership recognizes the massive impact of corona virus to the society and economy and collectively regrets all the losses of cherished ones related to it.

DRIVES partnership is gathering available and relevant free online trainings to allow the continuous training of automotive workers regarding upskilling and reskilling during these hard times when factories are being closed. (soon to be announced on DRIVES website)

DRIVES’ News

What have we been working on?

In the past trimester, the several work packages that make up the consortium have been working on different key aspects of the project. Below we have included some of the most relevant issues. For further details read the report in the Publications section of our website. For further details see our report here.

Report on the European Automotive Apprenticeship Marketplace

The DRIVES consortium, under the leadership of Work Package 5, is working on a report on the European Automotive Apprenticeship Marketplace. This report, to be published during the month of March, aims to support the development of a shared understanding of the
marketplace to help the automotive sector design and deliver apprenticeships effectively and meet identified challenges. Full report to be published soon.

Report on job role selection

The Work Package 3 has established a first training service, first course available from March 2020 and approximately 15 planned to available till end of July 2020 and 30 until end of 2020. The full set and available platform and training service in 2021.

Secondly, the portfolio that will be established is visible by a list of 30 job roles for which we have developed skills cards with defined skills. The training material offered mentioned is based on the skills defined. Full report to be published during the 2Q of 2020.

DRIVES workshop at EuroSpi 2020

The DRIVES' Work Package 3 is preparing a workshop on "Digitalisation of Industry, Infrastructure, and E-Mobility", at the EuroSpi 2020, at Hochschule Düsseldorf, 9.-11.9.2020, in Germany.

Digitalization of industry, vehicles, planes, infrastructure, services leads to new system and software architectures, new standards to be followed, new uses cases, new service models, and so forth. The EU Blueprint project DRIVES came up with a set of major drivers of change which are used below as thematic paper topics.

Digitalization of Industry, Vehicles, Planes, Infrastructure, Services leads to new system and software architectures, new standards to be followed, new uses cases, new service models, and so forth. The EU Blueprint project DRIVES came up with a set of major drivers of change which are used below as thematic paper topics.

Save-the-Date: High-Level Conference - "Skills and Transformation of the EU’s Automotive Sector", 27th of May 2020

The automotive industry is a strategic sector and has long been key to the creation of jobs across Europe. Today, the sector is experiencing a profound transition, driven by the shift to zero emission cars, automated and connected driving and new mobility patterns. The changes have an impact also on the workforce and are leading to profound skills gaps in the sector.
Workers will need to acquire new and more advanced technical and soft skills.

European Commission is launching the conference in the context of the initiatives, **COSME - Towards a common vision on addressing SMEs skills needs in the automotive sector: strengthening the development of upskilling and reskilling strategies** and **Erasmus + Sector Skills Alliance project, DRIVES**. The conference will be an opportunity to discuss the ongoing challenges for skills in the sector, reflect on the future and hear experiences about solutions and best practices for updating skills. The event will bring together policymakers at national and supranational levels, experts in the field, training providers, OEMs and SMEs.

More details to follow soon through our official channels.

*Stay tuned via the DRIVES website and other media channels for more news!*
