AUTOMOTIVE SKILLS OFFER SURVEY RESULTS

THINGS TO KNOW

Vocational Education and Training (VET) aims to equip people with knowledge, know-how, skills and/or competences required in particular occupations, or more broadly within the labour market.

The 3 most relevant types of VET in the context of the DRIVES project are: CVET, IVET and TVET.

DRIVES Partnership recognises the situation with COVID-19 and its impact in the Automotive sector. Obviously face-to-face mechanisms are harder to implement and it therefore raises the importance of online training.

HIGHLIGHTS

The Demand and the Offer both highlight the importance of “TRAINING ON THE JOB” as the most effective VET approach.

“MENTORING” and “DUAL SYSTEM / APPRENTICESHIPS” are present in both Demand and Offer replies. But they are rated high importance on the Demand side as opposed to a low rated in the Offer side.
